

OPEN ACCESS

Two main routes exist for open access to scientific peer-reviewed publications:

Self-archiving / 'Green' open access

The published article or the final peer-reviewed manuscript is archived in an online repository (ICIQ has created an institutional repository for this purpose). In this case, open access to the publication within a maximum embargo period of six months (European Commission) or twelve months (MINECO) must be ensured.

Open access publishing / 'Gold' open access

The article is published in open access journals, or in journals that offer the possibility of making individual articles openly accessible (hybrid journals). Depending on the funding agency, the author processing charges (APCs) for gold open access can be eligible for reimbursement during the duration of the project.

In all cases, open access via the chosen repository must be ensured upon publication.

JOURNALS OPEN ACCESS POLICIES

In the table below you can see the embargo period policy of the journals where most of the ICIQ papers are published. The summary provided is for the journal's default policies to the present day. They can be updated and, in some cases, authors could negotiate changes or exceptions. Please check at the moment of publication.
